Step 2: Create a New Repository

1. After logging in, click the **"+" icon** in the top-right corner.

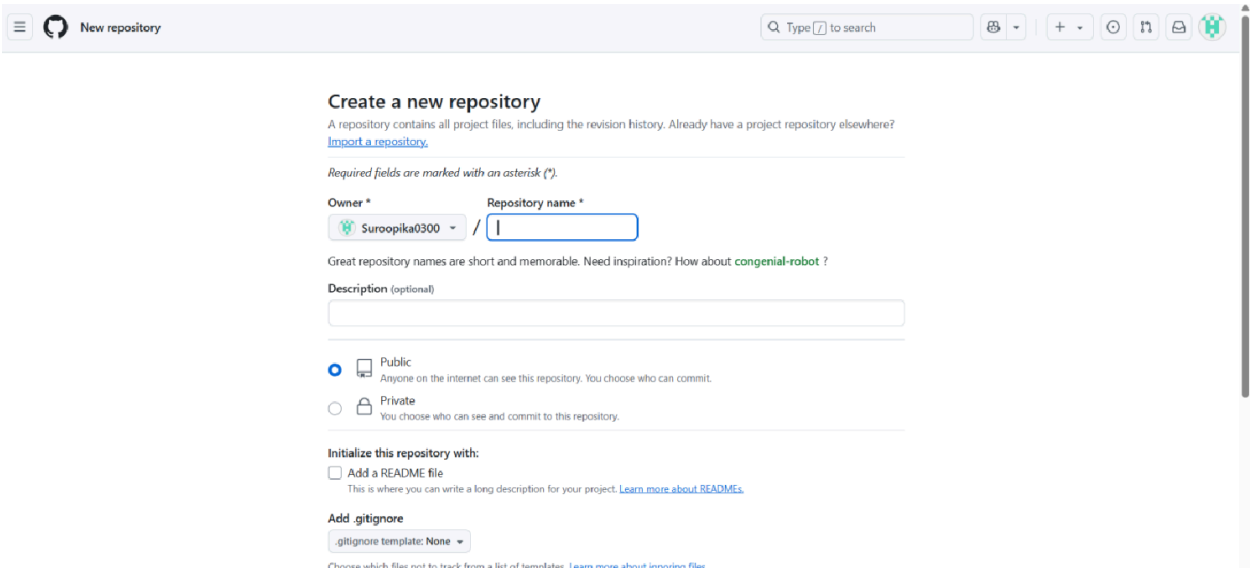
2. Select **"New repository"**.

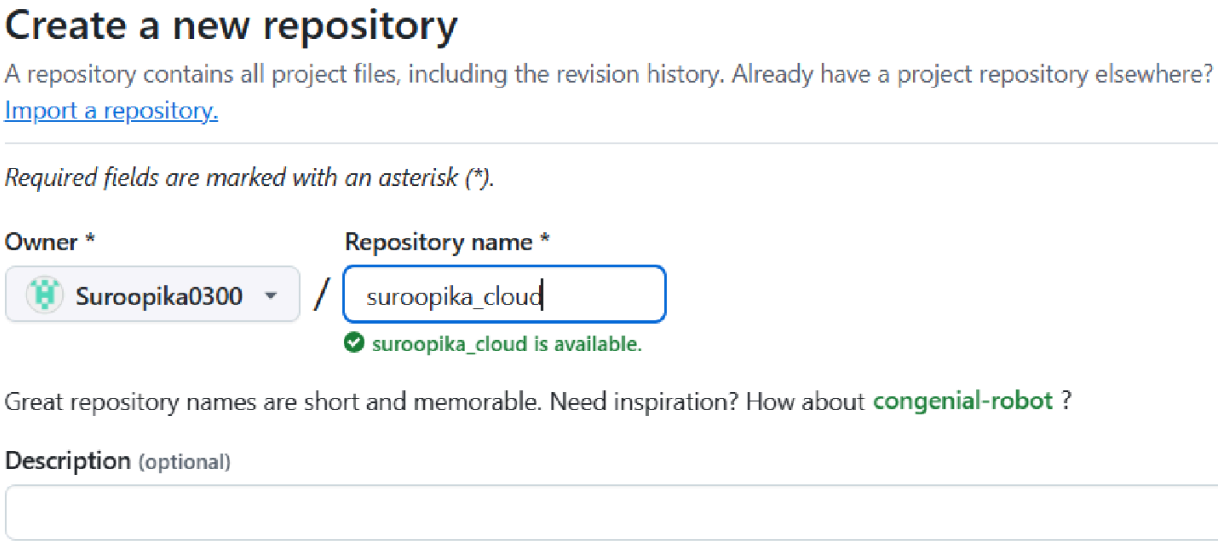
3. Enter a **repository name** (e.g., MyFirstRepo).

4. Choose **"Public" or "Private"**.

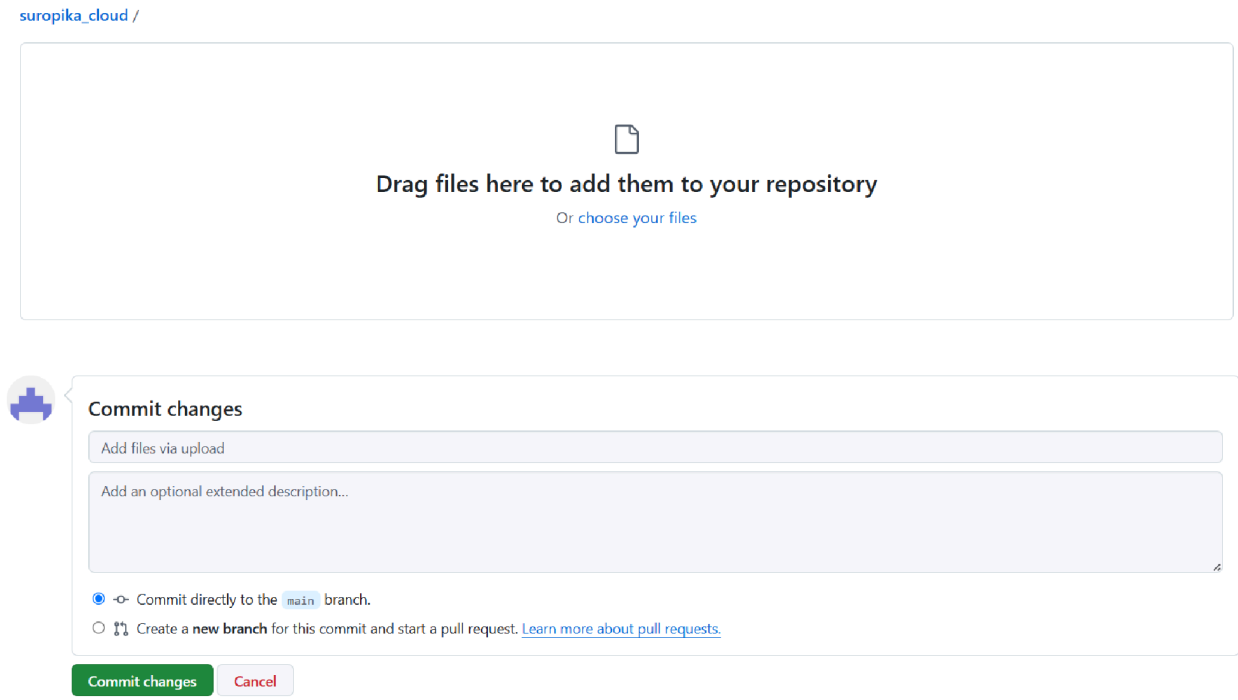
5. Check the box **"Add a README file"** (this initializes the repo with a README).

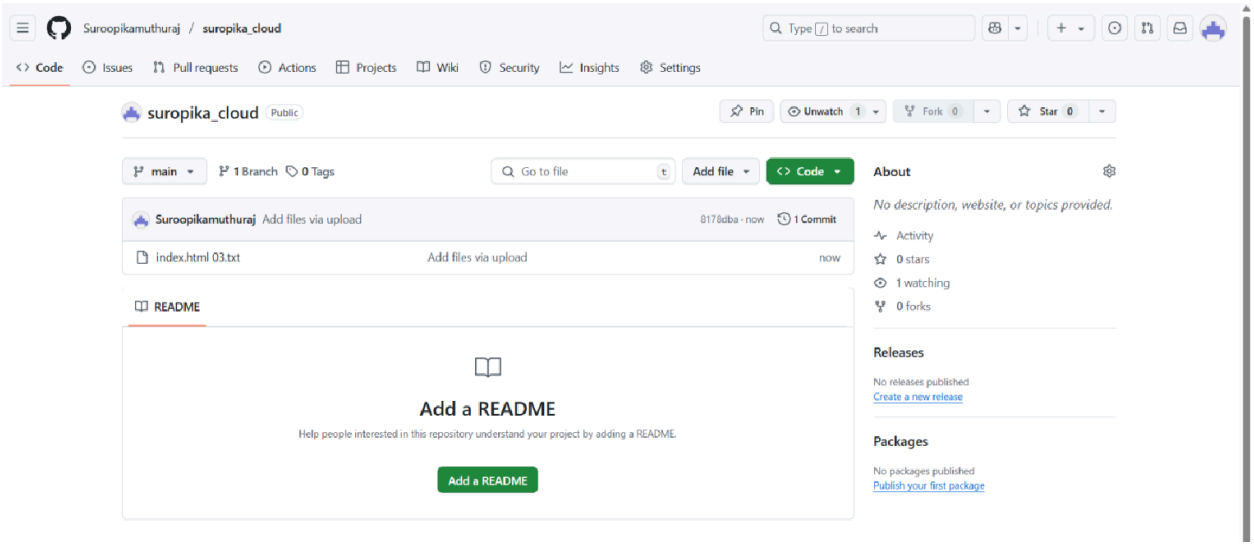
6. Click **Create repository**.





Step 3: Upload a File to GitHub

1. Open your newly created repository.
2. Click **"Add file" → "Upload files"**.
3. Click **"Choose your files"** and select the file you want to upload.
4. Add a **commit message** (e.g., "Added first file").




5. Click **"Commit changes"**.
